VELOCITIE Provides Consulting Services for Consumers Energy ArcGIS Implementation

GREEN BAY, WISCONSIN, USA – Aug. 28, 2006 – VELOCITIE Integration, Inc., a leading provider of integrated GIS solutions, is assisting Consumers Energy with its implementation of ArcGIS and ArcFM geo-spatial technology. Consumers Energy provides natural gas and electric service to nearly 6.5 million of Michigan's 10 million residents and serves customers in all 68 of the state's Lower Peninsula counties.

VELOCITIE's ArcGIS implementation services for Consumers Energy have included the installation of ArcGIS Server and ArcFM Server software and the development of work order posting tools. The work order posting tools developed by VELOCITIE enable Consumers Energy users to view georeferenced MicroStation engineering drawings directly over their GIS data within ArcMap.

"VELOCITIE has been valuable in the planning phases of the project and has offered solid technology solutions to meet Consumers Energy's operational GIS requirements. This technology will help us continue to provide the high level of service that our customers expect," said Kevin Bowman, the utility's Electric Distribution Records Supervisor.

Ken Lenser, Director of Integration Services at VELOCITIE stated: "VELOCITIE is excited to work with Consumers Energy on its implementation of geo-spatial technology. Consumers Energy has a strong vision of how GIS will provide enterprise-wide access to important electric facilities information."

About VELOCITIE
