### **VELOCITIE Completes Cityworks Implementation for Green Bay Water Utility**

**GREEN BAY, WISCONSIN – Feb. 14, 2008**– VELOCITIE Integration, Inc. announced the completed Cityworks® implementation for Green Bay Water Utility's (GBW) water distribution asset management. The Utility's service area extends beyond the City boundaries to include a population in excess of 120,000. GBW maintains approximately 450 miles of distribution main and 48 miles of supply mains for service to approximately 35,000 customers. Its primary source of water is Lake Michigan.

The Utility began using GIS in the early 1990s and enlisted the services of VELOCITIE for the ongoing expansion of its GIS since 2000. GBW again engaged VELOCITIE consultants as it embarked on an integrated GIS and asset management solution using Azteca's Cityworks suite of products.

VELOCITIE's Cityworks implementation services for GBW included:

- Requirements gathering
- Cityworks configuration and installation for the Water Distribution Department
- Development of CIS to Cityworks interface for customer account information
- Replacement of the legacy inventory tracking software with Azteca System's Storeroom module
- Development of an interface from Cityworks to GBW's contractor billing database
- System deployment, documentation, training, and ongoing support

Bill Hoisington, VELOCITIE'S Senior Consultant working with GBW, stated, "Cityworks is improving the way Green Bay Water manages its water distribution assets, by streamlining the work order and inventory tracking processes. Cityworks allows the work process information to be shared across the departments and the users now can see the work process graphically in the enterprise GIS."

Paul Pavlik, Distribution Manager, commented: "We are extremely pleased with how VELOCITIE guided us through the process of implementing Cityworks, and we are impressed with Cityworks ease of use for work order and inventory management. The software's ability to leverage our GIS data investment in its current format without costly data manipulation or integration was a key reason we selected Cityworks."

## **About VELOCITIE**

VELOCITIE Integration, Inc. provides enterprise consulting and integrated GIS solutions for energy companies, utilities, municipalities and telecommunication companies. The team at VELOCITIE brings over 245 years of combined experience in serving the GIS industry. VELOCITIE has the knowledge, insight, experience, and proven success to ensure that its clients have a clear path for implementing a wide array of industry leading products.
