VELOCITIE Completes Lima, Ohio, Utilities Department Cityworks Implementation

GREEN BAY, WISCONSIN – January 29, 2007 – VELOCITIE Integration, Inc., a leading provider of integrated GIS solutions, announced today that the City of Lima, Ohio, Utilities Department has completed its first phase of the Cityworks implementation. Cityworks is used in customer service and to manage field service operations for water and sewer, water treatment facilities, and wastewater treatment plant facilities.

VELOCITIE provided services to assist the City with the following activities:

- Configuring Cityworks to manage the Utility's water distribution and treatment and wastewater collection and treatment plant assets.
- Integrating Cityworks asset maintenance management products into the business processes of the City
- Migrating GIS data to ESRI's ArcGIS Geodatabase and legacy Work Orders data to Cityworks
- Providing training and documentation for administrators and end users

The project will continue in 2007 by deploying Cityworks to field crew trucks and developing interfaces to SCADA and the City's GEMS customer information software.

Bill Hoisington, VELOCITIE Project Manager commented, "This project at the City of Lima is one of the first Cityworks implementations for treatment plant asset management and reflects Cityworks flexible, GIS-centric design for use throughout a municipal organization."

David Schnipke, the City's Environmental Manager, states, "Cityworks has improved our work processes, increased our efficiency, and allowed the City to provide a higher level of service to our customers. Using VELOCITIE helped the City to complete the project on time and within our established budget."

About VELOCITIE

VELOCITIE Integration, Inc. provides integrated GIS solutions for energy companies, utilities, municipalities and telecommunication companies. The team at VELOCITIE brings over 245 years of combined experience in serving the GIS industry.
