VELOCITIE and Lima Utilities Department Move to Phase 2 of Cityworks Implementation

GREEN BAY, WISCONSIN – October 23, 2007 – VELOCITIE Integration, Inc., a leading provider of integrated GIS solutions, announced today that the City of Lima, Ohio, Utilities Department has received approval for its next phase of a Cityworks implementation. Phase I, completed in January 2007, allows customer service to manage field service operations for water distribution and sewer collection. That phase also provided asset management capabilities for water treatment facilities and wastewater treatment plant facilities.

Phase II of the project will expand the use of Cityworks by integrating it to several of the Department's operational systems and deploying additional seats to new users in the field. VELOCITIE will assist the Utilities Department in completing the following activities:

- Integrating Cityworks to the Utilities' Gasboy and SCADA systems
- Integrating Cityworks to the Ohio Underground Protection System (OUPS)
- Deploying Cityworks to the field services crews via truck mounted laptops
- Migrating additional legacy asset data to the GIS
- Upgrading Cityworks and the GIS to the latest product releases
- Assisting the City with integrating the Sewer CCTV Inspection to Cityworks process

Bart Koenig, President of VELOCITIE, states: "The rapid acceptance of Cityworks by the various groups within the Department to manage their assets speaks to the flexibility and broad appeal of the system. I'm pleased that the Utilities Department has elected to continue working with VELOCITIE as it builds on its previous successes in Phase I of the implementation."

David Schnipke, the City's Environmental Manager, states, "Now that most users have a year of experience using Cityworks, they have a better understanding of how to utilize the software's flexibility and tailor it to their individual needs. We especially look forward to moving our Field Services crews to a fully mobile environment in Phase II."

About VELOCITIE

VELOCITIE Integration, Inc. provides integrated GIS solutions for energy companies, utilities, municipalities and telecommunication companies. The team at VELOCITIE brings over 250 years of combined experience in serving the GIS industry. VELOCITIE's experience, combined with the technical expertise and industry-leading technology of Azteca Systems provides a complete CMMS solution.
